

Mobile Ambulance Simulator with Instructor Room

Southeastern Specialty Vehicles has teamed up with DiaMedical USA to build a classroom simulator that represents a value packed scenario and simulation unit that provides upcoming EMTs, Paramedics and others the ability to practice in a simulator that represents the same “real life” environment that they would encounter in the field, in the back of a real ambulance.

This simulator is an enclosed trailer with a patient area for training and an instructor area for them to view all participating medics.

Trailer specifications are 8’ wide X 24’ long with 6’10” interior height.

- Chrome front cap, cast upper
- Corners, chrome vertical corners
- Screw less .030 exterior metal
- Aluminum roof
- 24" stoneguard
- LED clearance light package
- Pair of LED taillights
- Extra pair of LED taillights
